

Andrés Camilo Vanegas

Frontend Developer · React & TypeScript

Villavicencio, Meta, Colombia · acvanegas99@gmail.com · github.com/Hankot91 · linkedin.com/in/camilov99

PROFESSIONAL SUMMARY

Systems Engineering student and Frontend Developer focused on React and TypeScript, with hands-on experience building modern web applications using component-based architecture, state management, and REST API integration. Comfortable working with Vite, Tailwind CSS, React Router, TanStack Query, shadcn/ui, Framer Motion, and serverless/edge functions (Vercel). I build personal projects that simulate real products to strengthen best practices in architecture, performance, and user experience. Looking for a junior Frontend Developer role to deliver quality solutions and keep growing professionally.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React 19, Vite, Tailwind CSS v4, React Router, TanStack Query, shadcn/ui, Framer Motion, Three.js / React Three Fiber
- **Backend / DB:** Java, Spring Boot, PHP, PostgreSQL, MySQL, Vercel Functions (Serverless / Edge)
- **Tools:** Git, GitHub, Vercel, Netlify, Figma, Postman, VS Code
- **Concepts:** REST API integration, edge/serverless functions, localStorage, component architecture, environment variables, ES Modules
- **Languages:** Spanish (native) — English (intermediate, B1-B2)

TECHNICAL PROJECTS

Nimbo — Weather App [GitHub](#) | [Demo](#)

React 19, TypeScript, Vite, Tailwind CSS v4, Framer Motion, React Three Fiber · 2026

- Real-time weather with hourly and daily forecasts, weather alerts, and an interactive 3D globe that pinpoints the searched city.
- Animated background that shifts gradient and effects (rain, snow, storm, fog, stars) based on the real weather and time of day.
- Serverless function on Vercel acting as a proxy to the Visual Crossing Weather API, keeping the API key off the client.

Games Hub — Free-to-Play Games Catalog [GitHub](#) | [Demo](#)

React 19, TypeScript, Vite, TanStack Query, React Router v7, Tailwind CSS v4, shadcn/ui, Recharts · 2023 – 2026

- Free-to-play games catalog with search, comparison tool, favorites, news, and a stats dashboard (Recharts).
- Consumes the public MMOBomb API through Vercel edge functions, with CDN caching (stale-while-revalidate).
- Favorites persisted in localStorage and synced across tabs with useSyncExternalStore.

Task Creator — Minimalist Manager [GitHub](#) | [Demo](#)

Vanilla JS (Módulos ES), HTML5, CSS3, localStorage · 2023

- Dependency-free task manager: create, edit, complete, and delete tasks, with full persistence in localStorage.
- Fixed a critical multi-delete bug by replacing accumulated listeners with the clone-and-replace pattern.

Org — Team Management App [GitHub](#) | [Demo](#)

React 18, Create React App, CSS Modules, uuid, hex-to-rgba · 2023

- Component-based architecture with 10+ reusable components (Card, Carousel, Form, Input, Button, etc.).
- Real-time team color customization using hex-to-rgba and React controlled state, persisted in localStorage.

Text Encryptor [GitHub](#) | [Demo](#)

Vanilla JS, HTML5, CSS3 · 2023

- Encrypts/decrypts text by swapping vowels for predefined keywords, with clipboard copy and input validation.

EDUCATION

Systems Engineering — Universidad de Los Llanos, Villavicencio, Colombia · May 2021 – Present (expected graduation 2026)

Frontend Developer Specialization — Alura Latam · Jun 2023 – Sep 2023 · Completed

GreenDigital Skills — Incon Academy · 2023 · Completed
